PROFESSIONAL SUMMARY

Flutter Developer with 3 years of experience designing, building, and shipping cross-platform mobile applications for Android and iOS. Skilled in Flutter, Dart, Firebase, REST APIs, WebSockets, real-time communication, and payment gateway integration. Strong grasp of mobile architecture (MVVM), state management, performance optimization, and end-to-end app store deployment.

TECHNICAL SKILLS

- Programming Languages: Dart, Java
- Frameworks & Tools: Flutter, Android SDK, Jetpack Compose, Coroutines, MVVM, GetX, Firebase, WebSocket, ExoPlayer, LiveKit, Agora, Dio
- Databases: Firebase Firestore, Firebase Realtime Database, SQLite, Hive, Supabase
- Other: Object-Oriented Programming, Data Structures & Algorithms, Flask, Machine Learning

EXPERIENCE

Flutter Developer — GenMakOct 2025 – Present

- Develop and maintain scalable cross-platform mobile applications using Flutter and Dart.
- Implement REST APIs, Firebase services, WebSocket communication, and real-time features.
- Publish and maintain applications on the Google Play Store and Apple App Store.
- Collaborate closely with designers, QA engineers, and backend teams to deliver high-quality products.

Associate Consultant – Frontend Development — Oodles TechnologiesMay 2024 – Sept 2025

- Developed Android and iOS applications using Flutter and Dart for multiple client projects.
- Integrated Firebase, push notifications, REST APIs, and WebSockets into production apps.
- Participated in code reviews and end-to-end feature development.
- Coordinated directly with clients for requirement gathering and project delivery.
- Published and maintained live applications on app stores post-release.

PROJECTS

Eat Well Tracker | [Link](#)

- Built a health-tracking app for monitoring diet, weight, and water intake, published on Google Play and the App Store.
- Implemented calorie tracking, water intake logs, weight monitoring, and a BMI calculator with interactive dashboards.
- Designed a responsive, intuitive interface for a seamless experience across smartphones and tablets.
- Integrated Firebase Firestore for real-time storage and synchronization across multiple devices.

GateTribe | [Link](#)

- Social networking application with real-time chat, push notifications, authentication, and privacy controls.
- Tech stack: Flutter, Firebase, WebSocket.

Influbee | [Link](#)

- Developed a Flutter-based app enabling users to connect and interact with influencers.
- Implemented Agora for real-time voice/video calling.
- Integrated REST APIs using the Dio package for secure and efficient data synchronization.

GenChat

- Built a real-time messaging application in Flutter supporting one-to-one and group chats over WebSockets.
- Implemented offline-first functionality with local SQLite storage, allowing message history to persist and auto-sync once connectivity is restored.
- Integrated voice/video calling via LiveKit and FCM push notifications for foreground, background, and terminated states.
- Built media sharing, forwarding/reply, delivery-read status, local caching; followed MVVM with GetX, optimized API calls.

EDUCATION

B.Tech, Computer Science & Engineering — AKTU University (80%)Sep 2020 – July 2024

Class XII (Science) — Oriental College, Patna, Bihar (75%)2020

Class X — Vidya Sanskar, Patna, Bihar (79.4%)2018
